DETAILED ACTION

1. This office action is in response to amendment dated: 4/12/2007. Based on this amendment, claims 1, 5-13, and 15-20 are pending. Claims 2-4 and 14 were cancelled.

Allowable Subject Matter

2. Claim 1, 5-13, and 15-20 are allowed.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose, teach or suggest directly, or indirectly the following limitations in combinations with other limitations of the claims, as follows:

As recited by claim 1,

"dynamically establishing a plurality, of ATM adaptation layer 2 (AAL2) channel identifiers (C1Ds) on a call-by-call basis using an ATM standards-based call control signaling protocol by mapping each of the CIDs, for submultiplexed cells that will be within an AAL2 stream in a single virtual channel connection, VCC, that connects a network edge device to a network access gateway, to a respective virtual path/virtual channel (VP/VC) within a virtual user network interface (UNI) of the protocol and wherein during call set\-up, each of the plurality of CIDs is individually set up and signaled as the respective VP/VC within a virtual UNI".

As recited by claim 5,

"mapping a plurality of ATM adaptation layer 2 (AAL2) channel identifiers (CIDs) of plurality of channels that will be within an AAL2 stream in a single virtual channel connection (VCC), to a plurality virtual path/virtual channel (VP/VC), respectively, within a user network

interface, UNI, of a standards-based ATM call control protocol and wherein, during call set-up, each of the plurality, of CIDs is individually set up and signaled as a respective one of the plurality of VP/VC, within the UNI".

As recited by claim 11,

"wherein the originating network edge device maps a respective virtual path identifier/virtual circuit (VPI/ VCI) within a virtual user network interface that is referenced in a cell header in accordance with the ATM forum promulgated signaling protocol, to a AAL2each of a plurality AAL2 channel identifiers (CIDs) of a stream of AAL2 sub-cells in a single virtual channel connection (VCC) and wherein each of the plurality of C1Ds is individually set up and signaled as the respective VPI/VCI, formatted in accordance with said ATM Forum promulgated signaling protocol, to said one of the network access gateways".

As recited by claim 15,

"means for mapping, setting up and signaling each AAL2 CID, of a plurality of AAL2 channels that are in an AAL2 stream within a single virtual channel connection between the network edge device and a network access gateway, individually as a respective VP/VC that is associated with a UNI port UNI's virtual gateway of said UNI".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
